PROFESSIONAL SUMMARY

ServiceNow Certified System Administrator and AI Engineer with 3+ years of experience designing AI-powered workflows, agentic automation, and enterprise ServiceNow solutions. Proven expertise building AI agents, RAG pipelines, and LLM-driven systems integrated with ServiceNow ITSM, Flow Designer, IntegrationHub and Virtual Agent. Experienced in workflow orchestration, incident classification, ticket routing, and automation of enterprise processes. Delivered measurable outcomes including 35% faster ticket processing, 29% reduction in operational incidents, and 15% improvement across enterprise platforms.

EDUCATION

Northeastern University, Boston, MA

Sept 2023 – Dec 2025

Master of Science, Data Analytics Engineering

VNR Vignana Jyothi Institute of Engineering & Technology, Hyderabad, India

Aug 2016 – Sept 2020

Bachelor of Technology, Electrical and Electronics Engineering

SKILLS

ServiceNow Platform(ServiceNow Certified System Administrator): ITSM (Incident, Problem, Change, Service Catalog), Flow Designer, IntegrationHub, Virtual Agent, Now Assist, Predictive Intelligence, Service Portal Development, Scoped Applications, Business Rules, UI Policies, Client & Server Scripts, REST APIs

ML/AI: Agentic AI, RAG Pipelines, LLM Orchestration, Prompt Engineering, Vector Databases, Embeddings, Retrieval Systems, Model Fine-tuning, Predictive Intelligence

Programming: Python, JavaScript, TypeScript, SQL, Node.js

Cloud & DevOps: AWS (Lambda, S3, Bedrock, EC2), Microservices, Docker, CI/CD Pipelines, REST API Integrations

Data Engineering: ETL/ELT Pipelines, MySQL, DynamoDB, PySpark

Other: Jira, GitHub, Tableau

WORK EXPERIENCE

The Burnes Center for Social Change – Boston, MA

Generative AI Engineer (Co-op → Part-Time Intern)

Jul 2024 – Jun 2025

- Engineered and deployed **two production AI agent systems** supporting **1000+ users across Massachusetts state agencies**, enabling automated information retrieval and improving response latency by **15%** using optimized RAG pipelines and prompt engineering.
- Designed **agentic AI workflows with multi-step reasoning and orchestration**, allowing autonomous query processing, contextual retrieval, and response generation, reducing manual workflow effort by **40%**.
- Built **backend services, REST APIs, and AI data pipelines** for document ingestion, embedding generation, and vector search using **Python and AWS Bedrock**, enabling scalable AI-driven decisioning.
- Implemented **AI governance and monitoring frameworks** including input validation, output evaluation, and model observability dashboards to track performance across 1000+ daily AI interactions.
- Developed **retrieval evaluation and debugging tools** to improve grounding accuracy and maintain responsible AI practices in enterprise deployments.
- Mentored 10 engineers on LLM orchestration, prompt engineering best practices, and RAG implementation strategies.

Deloitte Consulting – Hyderabad, India

Consultant, Enterprise Performance

Jan 2021 – Aug 2023

- Engineered 300+ ServiceNow automation workflows using Flow Designer, IntegrationHub, enabling automated incident classification, ticket routing, and workflow orchestration, reducing manual ticket processing time by 35%.
- Led ServiceNow ITSM implementation for SMBC, configuring Incident, Problem, Change, and Catalog modules with custom business rules, UI policies, and workflow automations that improved incident resolution time by 25%.
- Designed API-driven integrations connecting Jira and Microsoft Teams with ServiceNow via REST APIs and IntegrationHub, achieving a 29% reduction in operational incidents.
- Built reusable ServiceNow Portal components and custom scoped applications adopted across multiple client projects, cutting estimated delivery time for follow-on builds by 50%.
- Implemented data migration pipelines for 100,000+ ServiceNow records, including validation scripts, rollback strategies, and governance controls to ensure data integrity during platform upgrades.
- Built robust testing frameworks (unit, integration, regression) and technical documentation used by 50+ engineers, reducing team onboarding time by 60%; received 7 awards for engineering excellence and delivery.
